

Curriculum overview

In this topic, children will explore a variety of animals, including humans, and learn about their features, body parts and needs. They will develop their understanding of how animals are alike and different, and how humans can stay healthy and care for their bodies.

Key vocabulary

Features	The parts we notice on the animal.
Amphibian	An animal that lives both in water and on land.
Reptile	An animal with dry, scaly skin that usually lays eggs.
Mammal	Animals that grow hair or fur and their babies drink milk.
Herbivore	Animals that eat plants.
Carnivore	Animals that eat other animals (meat)
Omnivore	Animals that eat both plants and other animals.
Senses	Senses are the ways our body helps us see, hear, smell, taste and feel the world around us.

Our topic is... Animals including humans

Sticky knowledge

- Animals can be sorted into different groups.
- Different Animals eat different types of food.
- Animals have body parts that help them survive.
- Humans have five senses including sight, hearing, touch, taste and smell.
- Different body parts help us to do different things. For example, our nose helps us to breathe and smell.
