

Curriculum overview

In this unit, we will learn about the different plants we eat, how seeds grow into plants, what plants need to stay healthy, and the life cycle of a plant.

Key vocabulary

Flower	The part of a flowering plant that makes seeds.
Roots	The part of a plant that takes in water and holds the plant in the soil.
Stem	The part of a plant that holds it up and carries water to the leaves and flowers
Leaf	The part of a plant that makes food using sunlight.
Seed	The part of a plant that can grow into a new plant.
Bulb	A part of some plants that grows underground and stores food for the plant.
Germination	When a seed starts to grow into a new plant.

Our topic is...

Plants

Sticky knowledge

- Plants are living things that move, grow and reproduce.
- There are some plants that we can eat. Fruits and vegetables grow as part of a plant.
- Plants grow from either seeds or bulbs.
- Plants need water, sunlight and a suitable temperature to grow and be healthy.
- The plant life cycle is: seed, seedling, plant and flower.

Plants need...
